CENTRE OF EXCELLENCE IN FRONT END TECHNOLOGIES

A **Front-end developer** (or indeed **UI developer**) really depends on the technologies being used. If it is a web application then the front-end is going to be using a mix of technologies such as HTML, CSS, jQuery, Javascript, and perhaps Flash and even Silverlight.

Front-end developer is like an artist with HTML/CSS/Javascript as his tools on a large canvas called internet. With the growing internet and world shifting on web/mobile it has given in to a huge demand to Front-end Developers. Be it **Virtusa|Polaris**, **CTS**, **Infosys**, **Flipkart**, etc all are trying to get the best talent of front-end development to hire. If you are creative as well as has niche for designs and technology, **Front End Technologies COE** is for you, we are ready to train you in **HTML/CSS/Angular JS**
